During the mid-March of this year (2014), Matt St. John, manager at LVAC came to me saying he had another major injury for me. That injury belonged to Victoria Stitzer, a traditional "Reiki" Master of 25 years, clinical Hypnotist, Master of "NLP" and Panic and Theta Healer, who soon after became a client of mine. Upon meeting Ms. Stitzer, her arm was in a sling and she was in need of shoulder surgery. I explained my experience as a Quantum Touch Practitioner and informed her of the many shoulders I have repaired through using my Quantum Touch skills. After 5 sessions with Ms. Stitzer (approximately 4 weeks), her shoulder was healed, with no pain, no longer requiring shoulder surgery and back to the gym as usual. During one of our sessions, Victoria told me that she has never encountered someone with a comparable level of healing skills as I possess. Once her arm was healed and no longer an issue for her, she asked me if I could work on her lungs as well. As I do not have experience with repairing lungs, I told her that I would try my very best. After only 3 sessions, her lungs began to show great improvement, showing no more signs of the allergies that were affecting her.

Once we had completed these various sessions for her physical ailments, I then had four sessions with Victoria so that she could demonstrate some of her own skills. Victoria is an extremely gifted hypnotist; our sessions together were all very productive and performed in a professional manner. At this point in time, I have had three Reiki Masters witness and compliment my abilities with Quantum Touch; of those witnesses, Cheri Smith, Janet Power, as well as two "Herbally Grounded" managers. Not to mention, my brother as well; Terry Connor who made a total recovery from Cirrhosis of the liver as well as Hapatitis C after approximately a year in my care, where I preformed Quantum Touch on him daily.

I believe that my gift and the people I have helped these past 13 years speaks for itself. This gift has helped a variety of ailments from many different types of people.
